

Product Data Sheet VOC* Abatement Catalyst CTK 3

*VOC = Volatile organic compound

1. Composition

Active component:	Platinum 0.15 wt% and Palladium 0.15 wt%
Support material:	Alumina

2. Sales specification

Spheres diameter range:	2.4 - 4
Packing density	Approx 560 kg/m ³

3. Typical properties

Specific pore volume	approx. 0.78 ml/g
BET surface area	approx. 100m ² / g

4. Safety and handling

With each delivery of our products we will send a Material Safety Data Sheet

5. Used catalyst

Used catalyst may be returned to Stonemill AB for environmentally safe disposal.
